

<b>Contents</b>	<b>Page</b>
<b>Foreword</b>	<b>3</b>
<b>1 General</b>	<b>4</b>
1.1 Scope	4
1.2 Normative references	4
1.3 Assumptions	5
1.4 Distinction between principles and application rules	5
1.5 Definitions	5
1.6 Symbols	5
<b>2 Materials</b>	<b>6</b>
2.1 Structural stainless steels	6
2.2 Bolts	8
2.3 Welding consumables	9
<b>3 Durability</b>	<b>9</b>
<b>4 Serviceability limit states</b>	<b>10</b>
4.1 General	10
4.2 Determination of deflections	10
<b>5 Ultimate limit states</b>	<b>12</b>
5.1 General	12
5.2 Classification of cross-sections	12
5.3 Resistance of cross-sections	17
5.4 Buckling resistance of members	18
5.5 Uniform members in bending and axial compression	20
5.6 Shear resistance	21
5.7 Transverse web stiffeners	21
<b>6 Connection design</b>	<b>22</b>
6.1 General	22
6.2 Bolted connections	22
6.3 Design of welds	23
<b>7 Design assisted by testing</b>	<b>23</b>
<b>8 Fatigue</b>	<b>23</b>
<b>9 Fire resistance</b>	<b>23</b>
<b>Annex A [informative] Durability</b>	<b>24</b>
A.1 Introduction	24
A.2 Types of corrosion	25
A.3 Levels of risk	27
A.4 Selection of materials	27
A.5 Design for corrosion control	30
A.6 Connections	31
<b>Annex B [informative] Stainless steel in the work hardened condition</b>	<b>34</b>
B.1 General	34
B.2 Work hardening from cold rolling	34
B.3 Work hardening from fabrication	34
<b>Annex C [informative] Modelling of material behaviour</b>	<b>35</b>
C.1 General	35
C.2 Material properties	35
