DIN EN 13964:2007-02 (E)

Suspended ceilings - Requirements and test methods (includes Amendment A1:2006)

Contents

Page

1 Scope 4

2 Normative references 5

3 Terms and definitions 8
3.1 General 8
3.2 Suspended ceiling and substructure components (see Figure 1) 9
3.3 Ceiling membranes and ceiling membrane components 10
3.4 Typical suspended ceiling assemblies using volume or thin gauge materials 13

4 Requirements 17
4.1 Material and products - General 17
4.2 Modular dimensions 17
4.3 Mechanical resistance and stability of load bearing components 26
4.4 Safety in case of fire 29
4.5 Hygiene, health and environment - Toxic gasses and dangerous substances 31
4.6 Safety in use 31
4.7 Acoustics 32
4.8 Durability 33
4.9 Colour, light reflectance and gloss factor for suspended ceiling components 36
4.10 Thermal insulation 36

5 Loading capacity of substructures components - Test methods 36
5.1 General 36
5.2 Bending test of metal substructure profiles 37
5.3 Testing of metal suspension and connecting components 39
5.4 Acceptance factor k 43

6 Evaluation of conformity 43
6.1 General 43
6.2 Initial type testing 44
6.3 Factory production control (FPC) 44

7 Marking, labelling and packaging 47
7.1 Marking and labelling 47
7.2 Packaging 47

Annex A (informative) Guidance for installation 48

Annex B (normative) Selection of top fixing and perimeter trim fixing 51

Annex C (informative) Wind load resistance 53

Annex D (normative) Impact resistance 54

Annex E (normative) Formaldehyde classes and associated test methods 58

Annex F (normative) Membrane components - Flexural tensile strength test 60

Annex G (normative) Suspension component - Functional test 68

Annex ZA (informative) Clauses of this European Standard addressing essential requirements or other provisions of EU Directives 70
