DIN EN 13791:2008-05 (E)

Assessment of in-situ compressive strength in structures and precast concrete components

Contents

Page

Foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Symbols and abbreviations 9

5 Principles 10

6 Characteristic in-situ compressive strength in relation to compressive strength class 10

7 Assessment of characteristic in-situ compressive strength by testing of cores 11
7.1 Specimens 11
7.2 Number of test specimens 11
7.3.2 Approach A 12
7.3.3 Approach B 12

8 Assessment of characteristic in-situ compressive strength by indirect methods 13
8.1 General 13
8.1.1 Methods 13
8.1.2 Alternative 1 - Direct correlation with cores 13
8.1.3 Alternative 2 - Calibration with cores for a limited strength range using an established relationship 14
8.2 Indirect tests correlated with in-situ compressive strength, (Alternative 1) 14
8.2.1 Application 14
8.2.2 Testing procedure 14
8.2.3 Establishing the relationship between test result and in-situ compressive strength 14
8.2.4 Assessment of in-situ compressive strength 14
8.3 Use of a relationship determined from a limited number of cores and a basic curve, (Alter- native 2) 15
8.3.1 General 15
8.3.2 Testing 15
8.3.3 Procedure 15
8.3.4 Validity of relationships 19
8.3.5 Estimation of in-situ compressive strength 19
8.4 Combination of in-situ strength test results by various test methods 19

9 Assessment where conformity of concrete based on standard tests is in doubt: 20

10 Assessment report 21

Annex A (informative) Factors influencing core strength 22

A.1 General 22
A.2 Concrete characteristics 22
A.2.1 Moisture content 22

A.2.2 Voidage 22
A.2.3 Direction relative to the casting 22
A.2.4 Imperfections 22
A.3 Testing variables 22
A.3.1 Diameter of core 22
A.3.2 Length/diameter ratio 23

7.3.1 General 12
7.3 Assessment 12

A.3.3 Flatness of end surfaces 23
A.3.4 Capping of end surfaces 23
A.3.5 Effect of drilling 23
A.3.6 Reinforcement 23

Annex B (informative) Factors influencing results by indirect test methods 24

B.1 Rebound hammer tests 24
B.2 Ultrasonic pulse velocity measurements 24
B.3 Pull-out tests 24

Annex C (informative) Concepts concerning the relationship between in-situ strength and strength from standard test specimens 25

assessing in-situ strength 26

D.1 Planning 26
D.2 Sampling 26
D.3 Testing programme 26
D.4 Assessment 27
