ISO 15901-2:2006-12 (E)

Pore size distribution and porosity of solid materials by mercury porosimetry and gas adsorption - Part 2: Analysis of mesopores and macropores by gas adsorption

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols 4

5 Principles 5
5.1 General principles 5
5.2 Choice of method 6

6 Verification of apparatus performance 7

7 Calibration 7

8 Sample preparation 7

9 Static volumetric method 8
9.1 Principle 8
9.2 Apparatus and materials 8
9.3 Typical test procedure 9
9.4 Calculations 11

10 Flow volumetric method 13
10.1 Principle 13
10.2 Apparatus and materials 14
10.3 Typical test procedure 14
10.4 Calculations 14

11 Carrier gas method 14
11.1 Principle 14
11.2 Apparatus and materials 15
11.3 Typical test procedure 15
11.4 Calculations 15

12 Gravimetric method 16
12.1 Principle 16
12.2 Apparatus and materials 16
12.3 Typical test procedure 16
12.4 Calculations 16

13 Types of isotherms 17
13.1 General 17
13.2 Types of hysteresis loops 19

14 Calculation of pore size distribution 20

14.1 The use of reference isotherms 20
14.2 Micropores 21
14.3 Mesopores and macropores 21
14.4 Representation of Pore Size Distribution 23

15 Reporting of results 25

Annex A (informative) Example of calculation of mesopore size distribution 26
