

DIN EN 13501-2:2008-01 (E)

Fire classification of construction products and building elements - Part 2: Classification using data from fire resistance tests, excluding ventilation services

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	7
3	Terms and definitions	8
4	Fire scenarios	11
4.1	General	11
4.2	The standard temperature/time curve (post flash-over fire)	12
4.3	The slow heating curve (smouldering fire)	12
4.4	The 'semi-natural' fire	13
4.5	The external fire exposure curve	13
4.6	Constant temperature attack	13
5	Resistance to fire performance characteristics	13
5.1	General	13
5.2	Performance characteristics	14
5.2.1	R - Loadbearing capacity	14
5.2.2	E - Integrity	14
5.2.3	I - Thermal insulation	15
5.2.4	W - Radiation	17
5.2.5	M - Mechanical action	17
5.2.6	C - Self-closing	17
5.2.7	S - Smoke leakage	18
5.2.8	G - 'Soot fire' resistance	18
5.2.9	K - Fire protection ability	18
6	Declaration of fire resistance performance	19
6.1	Classification periods	19
6.2	Designatory letters	19
6.3	Declaration of performance	19
6.4	Combinations of classes	20
6.5	Particular classifications	20
6.5.1	Fire doors and shutters	20
6.5.2	Conveyor systems and their closures	20
6.6	Additional performance parameters	21
6.6.1	Optional performance parameters	21
6.6.2	Expansion of performance parameters	21
6.6.3	Particular performance parameters	21
6.7	Presentation of classification	22
6.8	Declaration of fire resistance classes in product specifications	22
7	Classification procedure for fire resistance	22
7.1	General	22
7.1.1	Procedure	22
7.1.2	General rules for deducing the number of standard temperature/time fire resistance tests	24

7.2	Classification of loadbearing elements without a fire separating function	25
7.2.1	General	25
7.2.2	Classification of loadbearing walls without separating function	26
7.2.3	Classification of loadbearing floors and roofs without fire separating function	27
7.2.4	Classification of beams	28
7.2.5	Classification of columns	28
7.2.6	Classification of balconies, walkways and stairs	29
7.3	Classification of loadbearing elements with fire separating function	30
7.3.1	General	30
7.3.2	Classification of loadbearing walls with fire separating function	30
7.3.3	Classification of loadbearing floors and roofs with fire separating function	32
7.3.4	Classification of raised floors	34
7.4	Products and systems for protecting elements or parts of works	35
7.4.1	General	35
7.4.2	Tests to be carried out	36
7.4.3	Test methods	36
7.4.4	Performance criteria	36
7.4.5	Classes	37
7.4.6	Classification of protected structural members	37
7.5	Classification of non-loadbearing elements	40
7.5.1	General	40
7.5.2	Partitions	41
7.5.3	Classification of curtain walling	42
7.5.4	Classification of ceilings with independent fire resistance	44
7.5.5	Classification of fire doors and shutters including their closing devices	45
7.5.6	Classification of smoke control doors	47
7.5.7	Classification of closure and conveyor system assemblies	48
7.5.8	Classification of penetration seals	50
7.5.9	Classification of linear joint seals	52
7.5.10	Classification of service ducts and shafts	53
7.5.11	Classification of chimneys	55
7.6	Classification of wall and ceiling coverings for fire protection ability	56
7.6.1	General	56
7.6.2	Test method	57
7.6.3	Tests to be carried out	57
7.6.4	Performance criteria for fire protection ability	57
7.6.5	Classes	58
A.1	General	59
A.2	Content and format	59
A.3	Classification report format	61
	for products and systems for protecting elements or parts of work	65
B.1	General	65
B.2	Characterisation data for protective vertical membranes	65
B.3	Characterisation data for applied protection to concrete members	66
B.4	Characterisation data for applied protection to steelwork	67
B.5	Characterisation data for applied protection to concrete/profiled sheet steel composite members	69
B.6	Characterisation data for applied protection to concrete filled hollow steel columns	70
B.7	Characterisation data for applied protection to timber members	71
	Bibliography	79
	Annex B (informative) Presentation of characterisation data and their field of application Annex A (normative) Classification report	59
