

# DIN EN 1670:2007-06 (E)

## Building hardware - Corrosion resistance - Requirements and test methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	6
4	Classification .....	6
5	Requirements .....	6
5.1	General .....	6
5.2	General test requirements .....	6
5.3	Functional acceptance condition .....	7
5.4	Appearance acceptance condition .....	7
5.4.1	General .....	7
5.4.2	Degree of rust .....	7
5.4.3	Degree of blistering .....	7
6	Test conditions .....	7
6.1	General conditions .....	7
6.2	Treatment following the corrosion test .....	8
7	Marking .....	8
Annex A (informative)	Examples of service conditions for which the various grades of corrosion resistance are appropriate .....	9
Bibliography .....		10
