DIN EN 13947:2007-07 (E)

Thermal performance of curtain walling - Calculation of thermal transmittance

Contents

Page

1 Scope 6

2 Normative references 6

3 Terms and definitions, symbols and units 7
3.1 Terms and definitions 7
3.2 Symbols and units 7
3.3 Subscripts 7
3.4 Superscripts 8

4 Geometrical characteristics 8
4.1 Main principles 8
4.2 Developed areas and internal depth 11
4.3 Boundaries of curtain wall structures 11
4.3.1 General 11
4.3.2 Boundaries of a representative reference element 12
4.3.3 Curtain wall areas 13

5 Cut-off planes and partitioning of thermal zones 14
5.1 Rules for thermal modelling 14
5.2 Cut-off planes of the geometrical model 14

6 Calculation of curtain wall transmittance 14
6.1 Methodologies 14
6.2 Single assessment method 15
6.2.1 Thermal transmittance of glazing units and panels (filling elements) 15
6.2.2 Determination of the heat flow through filling element / mullion or transom / filling element connection 16
6.2.3 Determination of the overall thermal transmittance of a curtain wall (Ucw) 20
6.3 Component assessment method 21
6.3.1 General 21
6.3.2 Definition of areas 21
6.3.3 Thermal transmittance of glazing units and panels (filling elements) 24
6.3.4 Thermal transmittance of frames, mullions and transoms 24
6.3.5 Linear thermal transmittance 25
6.4 Thermal transmittance of a curtain wall built of different elements 27

7 Input data 28

8 Report 29
8.1 Section drawings 29
8.2 Overview drawing of the whole curtain wall element 29
8.3 Values used for calculation 29
8.4 Presentation of results 29

Annex A (informative) Guidance for calculating the thermal transmittance Ucw of curtain walling using the two methods 30

Annex B (informative) Linear thermal transmittance of junctions 31

Annex C (normative) A method for calculating the thermal effect of screws using a 2D numerical method and the procedures specified in EN ISO 10077-2 39

C.1 General ... 39
C.2 Calculation of the equivalent thermal conductivity of the screw s,eq ... 40
C.3 Consideration of screw heads and washers ... 40

Annex D (normative) Ventilated and unventilated air spaces ... 41

Unventilated air layer ... 41

Annex E (informative) Component method: Calculation example ... 44

E.1 Data for examples ... 44
E.2 Frames ... 46
E.2.1 Definition and evaluation of areas ... 46
E.2.2 Evaluation of Uf values ... 47
E.3 Glazing units ... 48
E.3.1 Definition and evaluation of areas ... 48
E.3.2 Evaluation of Ug values ... 48
E.3.3 Definition of lg and evaluation of g, m,f and t,f ... 48
E.4 Panels ... 49
E.4.1 Definition and evaluation of areas ... 49
E.4.2 Evaluation of Up values ... 49
E.4.3 Definition of lp and evaluation of the p values ... 50
E.4.4 Calculation of a complete element ... 50

Annex F (informative) Single assessment method: Calculation example ... 51

F.1 General description of examples ... 51
F.2 Centre U-value of the glazing unit ... 52
F.3 Centre U-value of the spandrel panel ... 52
F.4 U-values of thermal joints ... 52
F.5 Overall U-value of the curtain wall ... 53
