ISO 22965-2:2007-04 (E)

Concrete - Part 2: Specification of constituent materials, production of concrete and compliance of concrete

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols and abbreviated terms 3

5 Requirements for constituent materials 4
5.1 General 4
5.2 Cements 4
5.3 Additions 4
5.4 Aggregates 5
5.5 Mixing water 5
5.6 Admixtures 6

6 Requirements for concrete 6
6.1 Requirements for composition of concrete 6
6.2 Requirements for fresh concrete 7
6.3 Requirements for hardened concrete 8

7 Production control of concrete 11
7.1 General 11
7.2 Production-control systems 11
7.3 Testing 13

8 Delivery of fresh concrete 13
8.1 Delivery ticket for ready-mixed concrete 13
8.2 Delivery information for site-mixed concrete 14
8.3 Transport of concrete 14

9 Compliance control and compliance criteria 15
9.1 General 15
9.2 Sampling and testing plan 15
9.3 Compliance of an individual batch or load 16
9.4 Compliance over an assessment period 16

10 Evaluation of compliance 17
10.1 General 17
10.2 Assessment, surveillance and certification of production control 17

Annex A (informative) Guidance on a "benchmark" production-control system 18

Annex B (informative) Concrete families 28

Annex C (normative) Provisions for assessment, surveillance and certification of production control 29

Annex D (informative) Additional provisions for high-strength concrete 32

Annex E (normative) Compliance criteria for an individual batch for consistence and properties other than consistence 34

Annex F (informative) Guidance for the use of the k-value concept 37

Annex G (informative) Guidance on the national annex 39

Bibliography 41
