## Dentistry - Test methods for rotary instruments

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....                                       | 1           |
| 2                     | Normative references .....                        | 1           |
| 3                     | Terms and definitions .....                       | 1           |
| 4                     | Measurement and test methods .....                | 2           |
| 4.1                   | General .....                                     | 2           |
| 4.2                   | Ambient conditions .....                          | 2           |
| 4.3                   | Measurements .....                                | 2           |
| 5                     | Measurement of single characteristics .....       | 2           |
| 5.1                   | Measuring instrument .....                        | 2           |
| 5.2                   | Shape of the working part .....                   | 2           |
| 5.3                   | Diameter of the working part .....                | 2           |
| 5.3.1                 | Location of measurement points .....              | 2           |
| 5.3.2                 | Procedure .....                                   | 3           |
| 5.3.3                 | Evaluation of test results .....                  | 3           |
| 5.4                   | Neck diameter .....                               | 3           |
| 5.4.1                 | Location of measurement points .....              | 3           |
| 5.4.2                 | Procedure .....                                   | 3           |
| 5.5                   | Dimensions of shanks .....                        | 3           |
| 5.5.1                 | Shank diameter .....                              | 3           |
| 5.5.2                 | Shank length .....                                | 4           |
| 5.6                   | Dimensions of mandrels .....                      | 4           |
| 5.7                   | Length of working part .....                      | 4           |
| 5.7.1                 | Location of measurement points .....              | 4           |
| 5.7.2                 | Procedure .....                                   | 4           |
| 5.8                   | Overall length .....                              | 4           |
| 5.8.1                 | Location of measurement points .....              | 4           |
| 5.8.2                 | Procedure .....                                   | 4           |
| 5.9                   | Angle of taper of working part .....              | 4           |
| 5.9.1                 | Location of measurement points .....              | 4           |
| 5.9.2                 | Procedure .....                                   | 4           |
| 5.10                  | Run-out of the working part .....                 | 5           |
| 5.10.1                | Apparatus .....                                   | 5           |
| 5.10.2                | Location of measurement points .....              | 6           |
| 5.10.3                | Procedure .....                                   | 6           |
| 5.11                  | Neck strength test .....                          | 6           |
| 5.11.1                | Apparatus .....                                   | 6           |
| 5.11.2                | Test force .....                                  | 7           |
| 5.11.3                | Procedure .....                                   | 7           |
| 5.11.4                | Calculation of test force for neck strength ..... | 7           |
| 5.11.5                | Evaluation .....                                  | 8           |
| 5.12                  | Surface roughness .....                           | 8           |
| 6                     | Test report .....                                 | 8           |
| Annex A (informative) | Deduction of the neck strength formula .....      | 9           |
