

DIN EN ISO 20749:2023-10 (E)

Dentistry - Pre-capsulated dental amalgam (ISO 20749:2023)

Contents

	Page
European foreword	4
Foreword	5
Introduction	7
1 Scope	8
2 Normative references	8
3 Terms and definitions	9
4 Requirements	10
4.1 Package and capsule contamination	10
4.2 Chemical composition and purity of the dental amalgam alloy	10
4.3 Large particles in the dental amalgam alloy powder	10
4.4 Loss of mass from the capsule during mixing	10
4.5 Yield of dental amalgam from the capsule	10
4.6 Consistency of the dental amalgam from capsule to capsule	11
4.7 Properties of the dental amalgam	11
4.7.1 General	11
4.7.2 Creep	11
4.7.3 Dimensional changes during hardening	11
4.7.4 Compressive fracture stress at 2 h	11
4.7.5 Compressive fracture stress at 24 h	11
4.8 Appearance of mixed dental amalgam before setting	12
4.9 Corrosion resistance of the dental amalgam	12
4.10 Length tolerance for the capsule	12
5 Sampling	12
6 Test methods	12
6.1 Package and capsule contamination	12
6.1.1 Principle	12
6.1.2 Test sample	12
6.1.3 Apparatus	12
6.1.4 Procedure	12
6.1.5 Treatment of the results	13
6.1.6 Report	13
6.2 Chemical composition and purity of the dental amalgam alloy	13
6.2.1 Principle	13
6.2.2 Test sample	13
6.2.3 Apparatus	13
6.2.4 Procedure	14
6.2.5 Treatment of the results	14
6.2.6 Report	14
6.3 Large particles in the dental amalgam alloy powder	15
6.3.1 Principle	15
6.3.2 Test sample	15
6.3.3 Apparatus	15
6.3.4 Procedure	15
6.3.5 Treatment of the results	15
6.3.6 Report	15
6.4 Loss of mass from the capsule during mixing	16

6.4.1	Principle	16
6.4.2	Test sample	16
6.4.3	Apparatus	16
6.4.4	Test procedure	16
6.4.5	Treatment of the results	17
6.4.6	Report	17
6.5	Yield of amalgam from the capsule	18
6.5.1	Principle	18
6.5.2	Test sample	18
6.5.3	Apparatus	18
6.5.4	Test procedure	18
6.5.5	Treatment of the results	19
6.5.6	Report	19
6.6	Consistency of the dental amalgam from capsule to capsule	20
6.6.1	Principle	20
6.6.2	Test sample	20
6.6.3	Apparatus	20
6.6.4	Test piece production	21
6.6.5	Procedure	21
6.6.6	Microhardness measurement	22
6.6.7	Treatment of the results	22
6.6.8	Report	23
6.7	Properties of the dental amalgam	23
6.7.1	Principle	23
6.7.2	Mould for the preparation of test pieces for determining creep, dimensional change during hardening and compressive fracture stress	23
6.7.3	Test sample	28
6.7.4	Test piece production	28
6.7.5	Procedure for the determination of creep	30
6.7.6	Procedure for the determination of dimensional change during hardening	31
6.7.7	Procedure for the determination of compressive fracture stress	33
6.8	Appearance of the mixed dental amalgam before setting	35
6.8.1	Principle	35
6.8.2	Apparatus	35
6.8.3	Procedure	35
6.8.4	Treatment of the results	36
6.8.5	Report	36
6.9	Corrosion resistance of the dental amalgam	36
6.9.1	Principle	36
6.9.2	Test sample	36
6.9.3	Procedure	37
6.9.4	Treatment of results	37
6.9.5	Report	37
6.10	Length tolerance for the capsule	38
6.10.1	Principle	38
6.10.2	Test sample	38
6.10.3	Apparatus	38
6.10.4	Procedure	38
6.10.5	Treatment of results	38
6.10.6	Report	38
7	Test report	39
8	Marking and labelling	39
8.1	Information	39
8.2	Labelling of the package for dental mercury	40
8.3	Labelling of the outer surface of package or container used for shipping	40
8.4	Instructions for use	41
8.5	Precautionary notes	41
	Bibliography	42
