

# DIN EN 16258:2013-03 (E)

## Methodology for calculation and declaration of energy consumption and GHG emissions of transport services (freight and passengers)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
<b>1</b>	<b>Scope .....</b>	<b>6</b>
<b>2</b>	<b>Terms, definitions and abbreviations .....</b>	<b>6</b>
2.1	General terms .....	6
2.2	Specific terms .....	9
<b>3</b>	<b>Units and symbols .....</b>	<b>11</b>
3.1	Energy .....	11
3.2	GHG emissions .....	11
<b>4</b>	<b>Quantification boundaries .....</b>	<b>12</b>
4.1	General .....	12
4.2	Processes included .....	12
4.3	Processes not included .....	12
4.4	Greenhouse gases .....	13
4.5	Carbon offsetting and emissions trading .....	13
<b>5</b>	<b>Principles of calculation of energy consumption and GHG emissions in transport services .....</b>	<b>13</b>
5.1	General objectives .....	13
5.2	Steps of the calculation of energy consumption and GHG emissions of one transport service .....	14
5.3	Sub steps for the calculation of energy consumption and GHG emissions of one leg of one transport service .....	14
5.4	Categories of values used for the calculation .....	14
5.4.1	General .....	14
5.4.2	Use of default values .....	15
<b>6</b>	<b>Principles of identification of the different legs of a transport service .....</b>	<b>15</b>
<b>7</b>	<b>Principles of the calculation at the vehicle operation system (VOS) level .....</b>	<b>15</b>
7.1	General .....	15
7.2	Sub step 2.1: Establishing the VOS related to the leg .....	15
7.3	Sub step 2.2: Quantification of the total fuel consumption for the VOS .....	16
7.4	Sub step 2.3: Calculation of total energy consumption and GHG emissions for the VOS ..	16
<b>8</b>	<b>Principles of allocation to cargo and/or passengers .....</b>	<b>17</b>
8.1	General .....	17
8.2	Basic principles .....	18
8.3	Allocation parameters and units .....	18
8.3.1	General .....	18
8.3.2	Allocation for passengers .....	18
8.3.3	Allocation for freight .....	18
8.3.4	Combined transport of passengers and freight .....	19
8.4	Data collecting .....	20
<b>9</b>	<b>Principles of summing the results for each leg .....</b>	<b>20</b>

10	Declaration .....	20
10.1	General .....	20
10.2	Possibility to make a short declaration .....	21
10.3	Supporting information .....	21
10.3.1	General statement .....	21
10.3.2	Transparent description of the method .....	21
<b>Annex A (normative) Energy and GHG emission factors .....</b>		<b>23</b>
A.1	Transport fuels .....	23
A.1.1	General .....	23
A.1.2	Consistency between sources .....	23
A.1.3	Table of energy and GHG emission factors .....	23
A.1.4	Biofuel Blends .....	25
A.1.5	Specified fuels .....	28
A.2	Electricity .....	28
A.2.1	Well-to-wheels energy factors .....	28
A.2.2	Well-to-wheels emission factors .....	28
A.2.3	Tank-to-wheels energy factor .....	29
A.2.4	Tank-to-wheels emission factor .....	29
<b>Annex B (normative) Allocation methods for ferries (maritime transport) .....</b>		<b>30</b>
B.1	General .....	30
B.2	Mass method .....	30
B.3	Area method .....	31
B.4	Default values .....	31
<b>Annex C (informative) Inclusion of empty trips into a VOS .....</b>		<b>32</b>
C.1	General .....	32
C.2	Example for a simple case .....	32
C.3	Example of a VOS for a distribution or collection round trip .....	33
<b>Annex D (informative) Template for declaration of categories of values used .....</b>		<b>34</b>
<b>Annex E (informative) Example for passengers: transport service by bus .....</b>		<b>35</b>
E.1	Description of the example .....	35
E.2	Example with use of specific measured values .....	36
E.3	Example with use of transport operator fleet values .....	37
E.4	Example with use of default values .....	38
E.5	Example with use of transport operator specific values .....	38
E.6	Overview of the results .....	39
<b>Annex F (informative) Examples for freight .....</b>		<b>40</b>
F.1	Transport service of freight transport by train .....	40
F.1.1	Description of the example .....	40
F.1.2	Example with use of specific measured values .....	41
F.1.3	Example with use of transport operator specific values .....	42
F.1.4	Examples with use of default values .....	43
F.1.5	Overview of the results .....	45
F.2	Transport service of freight transport by container ship .....	45
F.2.1	Description of the example .....	45
F.2.2	Example with use of specific measured values .....	46
F.2.3	Example with use of default values .....	47
F.2.4	Overview of the results .....	48
<b>Annex G (informative) Example for combined passenger and freight transport: ferry lines .....</b>		<b>49</b>

<b>G.1</b>	<b>Description of the example .....</b>	<b>49</b>
<b>G.2</b>	<b>Results and comparison of the two allocation methods .....</b>	<b>49</b>
	<b>Annex H (informative) Detailed sources used and calculations done for establishment of Table A.1 .</b>	<b>51</b>
	<b>Annex I (informative) Example of available sources of default values .....</b>	<b>65</b>
	<b>Bibliography .....</b>	<b>66</b>
