# DIN EN 17975:2025-12 (E)

## Maintenance - Risk control processes of energies and fluids risks in maintenance activities - Guidance

## Contents

Page

European foreword ..... 5

Introduction ..... 6

1 Scope ..... 7

2 Normative references ..... 7

3 Terms, definitions, and abbreviations ..... 7
3.1 Terms and definitions related to items and activities ..... 8
3.2 Terms and definitions related to energies & fluids lockout ..... 8
3.3 Terms and definitions related to risks and hazardous phenomena ..... 11
3.4 Terms and definitions related to organization ..... 12
3.5 Terms and definitions related to people ..... 13
3.6 Abbreviations ..... 14

4 Links between securing energies & fluids and maintenance processes ..... 14
4.1 Boundaries and interfaces ..... 14
4.2 Place of securing energies & fluids within maintenance processes ..... 15
4.3 Interactions with other safety mitigation in maintenance ..... 16
4.4 Equipment design and modification ..... 16
4.5 Relation to severe hazard and emergency response management ..... 16
4.6 Boundaries between maintenance and operating activities ..... 17

5 Risk analysis ..... 19
5.1 General issue: Systematic risk analysis mindset ..... 19
5.2 Risk analysis methodology when applied to maintenance tasks ..... 19
5.3 Specificities of risk analyses related to energies & fluids within maintenance tasks 20
5.3.1 Maintenance risk control methodology for energies & fluids within maintenance tasks ..... 20
5.3.2 Main elements to be considered when analysing maintenance activity ..... 22
5.3.3 Impact of safety device technology ..... 22
5.3.4 Effects of items configurations ..... 23
5.4 Sources of the main hazards to be considered (energies & fluids, products that are sources of dangerous phenomena) ..... 23
5.5 Design and methodology for selecting an energies & fluids lockout process ..... 24
5.5.1 Introduction - energies & fluids risk control process ..... 24
5.5.2 Flowchart of risk analysis ..... 24
5.5.3 Process application table ..... 25
5.5.4 Risk prioritization and mitigation ..... 27
5.5.5 Application to degraded (abnormal) situations ..... 27
5.6 Updating energies & fluids specific risk analysis ..... 28
5.6.1 Updating the risk analysis during a maintenance activity ..... 28
5.6.2 Updating the risk analysis before applying Standard Operating Procedures (SOP) ..... 28

6 Energies & fluids safety processes ..... 29
6.1 Energies & fluids lockout process ..... 29
6.1.1 General ..... 29
6.1.2 Reinforced Isolation by lockout/tagout of energies & fluids (RI) ..... 30
6.1.3 Standard Isolation (by lockout of energies & fluids) ..... 33
6.1.4 Neutralization of energies & fluids by the control systems ..... 36

6.1.5 Specific Provisions for activities involving energies & fluids (SP) ..... 38
6.2 Lockout/Tagout and safety check ..... 41
6.2.1 Energies & fluids source control ..... 41
6.2.2 Type ..... 42
6.2.3 Location ..... 43
6.2.4 Identifiers and markers ..... 43
6.2.5 Maintenance ..... 43
6.3 Compensatory measures and Specific Provisions ..... 44
6.4 Securing steps ..... 45
6.4.1 Technical steps - Reinforced and Standard Isolation steps flowchart ..... 45
6.4.2 Means of checking the removal or neutralization of the energies & fluids ..... 47
6.4.3 Determining the "key points" ..... 47
6.4.4 Specific case related to the fitting of plugs ..... 48
6.5 Specific features of "PARENT/CHILD" energies & fluids lockout ..... 48

7 Organizational provisions ..... 49
7.1 Organizational prerequisites ..... 49
7.2 Organizational provisions ..... 49
7.3 Quality rules related to energies & fluids lockout ..... 50
7.4 Energies & fluids competences management and training ..... 50
7.4.1 Warning ..... 50
7.4.2 Principle ..... 50
7.5 LOCKOUT Administration ..... 51
7.5.1 Principle ..... 51
7.5.2 Lockout devices ..... 51
7.5.3 Secure access to handling devices ..... 51
7.5.4 Procedure for removing locked devices ..... 51
7.6 Use of tags and locks ..... 52
7.6.1 Tags memo ..... 52
7.6.2 Locks management ..... 53
7.7 Specific features - Design and modification of equipment ..... 53
7.8 Energies & fluids lockout device identification sheet ..... 53
7.8.1 General ..... 53
7.8.2 Content ..... 53
7.8.3 Validation ..... 54
7.8.4 Updating ..... 54
7.8.5 Exclusions ..... 54

Annex A (informative) Organizational provisions ..... 55

A.1 Organizational provision ..... 55
A.2 Organizational quality rules ..... 58
A.3 Energies & fluids lockout competences, training ..... 60
A.4 Example: designation of competent people for energies & fluids lockout and maintenance operations ..... 62

Annex B (informative) Main elements to be considered when analysing maintenance activity ..... 64

Annex C (informative) Non-exhaustive list of energies & fluids sources and phenomena ..... 67

C.1 General ..... 67
C.2 Unexhaustive list of energies and fluids ..... 67

Annex D (informative) Preparation of energies & fluids lockout steps ..... 71

Annex E (informative) Example of isolation categories for pipes ..... 73

E.1 Isolation categories for pipes ..... 73
E.2 Selection of securing process given the existing setup ..... 73
E.3 Category B types (reinforced isolation) ..... 75
E.4 Category A types (standard isolation) ..... 78
E.5 Examples of practical diagrams for category B (reinforced isolation) ..... 79

E.6 Examples of practical diagrams for category A (standard isolation) ....83

Annex F (informative) Mechanical energies & fluids lockout ....85

F.1 General ....85
F.2 Gravity-related mechanical risks ....85
F.3 Mechanical risks caused by actuators ....85
F.4 Ventilation-related mechanical risks ....86
F.5 Mechanical risks caused by the effects of arching and walls ....86

Annex G (informative) Specific rules for PARENT/CHILD energies & fluids lockout processes ....87

G.1 General ....87
G.2 Specific rules for "PARENT/CHILD" ....87
G.3 Removal of a "PARENT" energies & fluids lockout ....88
G.4 "PARENT/CHILD" energies & fluids lockout ....88
G.5 "PARENT" energies & fluids lockout ....89
G.6 "CHILD" energies & fluids lockout ....90
G.7 Dedicated software management of "PARENT/CHILD" energies & fluids lockout ....90
G.8 Management of "PARENT/CHILD" energies & fluids lockout without dedicated software ..91

Annex H (informative) Document examples ....92

H.1 Set of document example ....92
H.2 LOTO form model example ....94
H.3 Tag model example ....95

Bibliography ....97
