DIN EN ISO 9241-171:2008-10 (E)

Ergonomics of human-system interaction - Part 171: Guidance on software accessibility (ISO 9241-171:2008)

Contents

Page

Foreword 3

Introduction 4

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Rationale and benefits of implementing accessibility 13

5 Principles for designing accessible software 13

6 Sources of variation in user characteristics 14

7 How to use this part of ISO 9241 15
7.1 General 15
7.2 Conformance 15

8 General guidelines and requirements 16
8.1 Names and labels for user-interface elements 16
8.2 User preference settings 19
8.3 Special considerations for accessibility adjustments 21
8.4 General control and operation guidelines 22
8.5 Compatibility with assistive technology 26
8.6 Closed systems 31

9 Inputs 31
9.1 Alternative input options 31
9.2 Keyboard focus 33
9.3 Keyboard input 34
9.4 Pointing devices 40

10 Outputs 44
10.1 General output guidelines 44
10.2 Visual output (displays) 44
10.3 Text/fonts 45
10.4 Colour 46
10.5 Window appearance and behaviour 47
10.6 Audio output 50
10.7 Text equivalents of audio (captions) 52
10.8 Media 52
10.9 Tactile output 53

11 On-line documentation, "Help" and support services 53
11.1 Documentation and "Help" 53
11.2 Support services 54

Annex A (informative) Overview of the ISO 9241 series 56

Annex B (informative) List of requirements 60

Annex C (informative) Sample procedure for assessing applicability and conformance 62

Annex D (informative) Activity limitation issues 73

Annex E (informative) Access features 79

Annex F (informative) Accessibility and usability 88
