

ISO/IEC 24757:2008-11 (E)

Information technology - Keyboard interaction model - Machine-readable keyboard description

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Conformance		1
3 Normative references		1
4 Terms and definitions		1
5 Requirements		2
5.1 Description of keys and keyboard layouts		2
5.2 States resulting from the interaction of function keys used for input		2
5.3 Special keys		4
5.4 Dead keys		4
5.5 Stickiness and stable (explicit) locking or temporary (implicit) latching		5
5.6 Supplementary keys (accessible or not by the computer software) ; Email, Fn function keys, «Windows» keys, Sleep, On/Off)		6
5.7 Complex state change (mainly for accessibility purposes)		6
5.8 Keyboard feedback		6
5.9 Machine-readable keyboard description language		6
Annex A (normative) Protocol for the exchange of information between the hardware keyboard and the software		8
Annex B (normative) Formal description language		9
B.1 Introduction		9
B.2 Overview		9
B.3 Sections		9
B.3.1 Dictionaries		9
B.3.2 Meta-information		10
B.3.3 Non-functional information		10
B.3.4 Functional information		10
B.4 A specification in RELAX NG language of the keyboard description format		11
B.5 A description in EBNF language of the keyboard format		14
B.5.1 Rules for BNF syntax		14
B.5.2 Grammar for ISO/IEC 24757 Relax NG descriptions		15
B.6 An example keyboard description		16
B.7 Format in XML syntax		17
Annex C (informative) Brief History of computer keyboards and their associated software		24
C.1 The IBM keyboard		24
C.2 The AT and PS/2 keyboard		24
C.3 The USB keyboard		25
Annex D (informative) Format Mapping		26

D.1	General	26
D.2	Unix/Linux X Window xkb keyboard format	26
D.2.1	xkb description	26
D.2.2	xkb example	26
D.2.3	Example of keyboard description in ISO/IEC 24757 syntax	54
D.2.4	Program to convert xkb descriptions to ISO/IEC 24757 format	122
	Bibliography	136
