

# ISO/IEC 29136:2012-05 (E)

## Information technology - User interfaces - Accessibility of personal computer hardware

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Conformance .....	3
4.1	Applying the requirements .....	3
4.2	Applying the recommendations .....	3
4.3	Evaluation of products .....	3
5	General requirements .....	3
5.1	Requirements related to ICT .....	3
5.2	Requirements related to software .....	3
5.3	Requirements related to interoperability with assistive technologies .....	3
5.4	Avoidance of erroneous operations and support of easy operations .....	3
5.5	Functionality provided as hardware support .....	4
5.6	Using readable labels .....	5
5.7	Connection .....	5
5.8	Alternative to biometric-based user authentication .....	7
5.9	User comfort .....	7
6	Requirements for input .....	7
6.1	Controls .....	7
6.2	Keyboard .....	8
6.3	Touch screen .....	10
7	Requirements for output .....	10
7.1	Visual information .....	10
7.2	Auditory information .....	11
8	Requirements for data storage devices and removable drives .....	12
8.1	Insertion and removal of a media and change of a drive .....	12
8.2	Notification of media insertion .....	12
9	Requirements for user support .....	13
9.1	Product information .....	13
9.2	Disclosure of information to distribution channel .....	14
9.3	Customer support .....	14
9.4	Maintenance information .....	14
Annex A (informative) Sample procedure for assessing applicability and conformance .....		15
Bibliography .....		25
