

ISO/IEC 29136:2012-05 (E)

Information technology - User interfaces - Accessibility of personal computer hardware

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Conformance	3
4.1 Applying the requirements	3
4.2 Applying the recommendations	3
4.3 Evaluation of products	3
5 General requirements	3
5.1 Requirements related to ICT	3
5.2 Requirements related to software	3
5.3 Requirements related to interoperability with assistive technologies	3
5.4 Avoidance of erroneous operations and support of easy operations	3
5.5 Functionality provided as hardware support	4
5.6 Using readable labels	5
5.7 Connection	5
5.8 Alternative to biometric-based user authentication	7
5.9 User comfort	7
6 Requirements for input	7
6.1 Controls	7
6.2 Keyboard	8
6.3 Touch screen	10
7 Requirements for output	10
7.1 Visual information	10
7.2 Auditory information	11
8 Requirements for data storage devices and removable drives	12
8.1 Insertion and removal of a media and change of a drive	12
8.2 Notification of media insertion	12
9 Requirements for user support	13
9.1 Product information	13
9.2 Disclosure of information to distribution channel	14
9.3 Customer support	14
9.4 Maintenance information	14
Annex A (informative) Sample procedure for assessing applicability and conformance	15
Bibliography	25
