

ISO/TS 9241-430:2021-12 (E)

Ergonomics of human-system interaction - Part 430: Recommendations for the design of non-touch gestural input for the reduction of biomechanical stress

| Contents | Page |
|--|-------------|
| Foreword..... | iv |
| Introduction..... | v |
| 1 Scope..... | 1 |
| 2 Normative references..... | 1 |
| 3 Terms and definitions..... | 2 |
| 4 Selection of non-contacting gestures..... | 3 |
| 4.1 Overall approach to the selection of non-contacting gestures..... | 3 |
| 4.2 Large shoulder and elbow movements..... | 3 |
| 4.3 Optimal hand location relative to body..... | 3 |
| 4.4 Wrist and forearm posture..... | 3 |
| 4.5 Comfort of hand postures and motions..... | 3 |
| 4.5.1 Fist, neutral and extended fingers..... | 3 |
| 4.5.2 Asynchronous adjacent finger postures..... | 4 |
| 4.5.3 Thumb flexion or extension and abduction or adduction..... | 4 |
| 4.5.4 Speed of finger or hand movements and impact..... | 4 |
| 4.5.5 Hand microgestures..... | 5 |
| 5 Evaluation of non-contacting gestures..... | 5 |
| 5.1 General..... | 5 |
| 5.2 Laboratory-based study design..... | 5 |
| 5.3 Subjects for studies..... | 5 |
| 5.4 Independent variables..... | 5 |
| 5.5 Example technologies for gesture capture..... | 6 |
| 5.6 Dependent variables (outcome measures)..... | 6 |
| 5.7 Examples of tasks..... | 7 |
| 5.8 Target size..... | 8 |
| 5.9 Data analysis, interpretation and reporting..... | 9 |
| Annex A (informative) Example of questionnaire for assessing subjective usability measures..... | 10 |
| Bibliography..... | 11 |
