Ergonomics of human-system interaction - Part 610: Impact of light and lighting on users of interactive systems

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Light and lighting -- more than just vision	4
4.1	How radiation impacts the human body	4
4.2	The role of light for life	5
4.3	Non-visual effects of radiation	6
4.4	A new definition of lighting	9
4.5	Why light is not light and daylight in interiors is different from solar light	9
4.6	The role of daylight and solar radiation	11
5	Light and circadian rhythms	11
5.1	Basics	11
5.2	Importance of light for the circadian rhythm	12
5.3	A new perspective on light	14
5.4	Relation to other zeitgebers	16
6	Light at night (LAN)	17
6.1	General	17
6.2	Studies of light at night (LAN or ALAN)	18
7	Light history (memory effect)	19
8	Physical characteristics	21
8.1	Spatial distribution of the source	21
8.2	Location of the source	21
8.3	Light spectrum and its role for vision	22
8.4	Light spectrum and its role for non-visual effects	23
8.5	Time and timing	24
8.6	Intensity	24
8.7	The role of visual displays	24
9	Individual differences	26
9.1	Chronotype	26
9.2	Age dependency	26
9.3	Internal circadian time (body time)	27
10	Conclusions	28
10.1	Agreed facts	28
10.2	Controversial issues	28
Annex A (informative)	Some useful behaviours of users or beneficial conditions for the physical environment	30
Bibliography		31
