Ageing societies - Accessibility and usability considerations for home healthcare products, related services and environments

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 General considerations for increasing accessibility and usability		2
4.1 Safety and security		2
4.2 Cleanliness, disinfection and sterilization		3
4.3 Independence and autonomy of care recipients		3
4.4 Accessibility in general		3
5 Considerations on home healthcare products for increasing accessibility and usability		4
5.1 Operation		4
5.1.1 General considerations		4
5.1.2 Specific considerations		5
5.2 Information and marking		6
5.2.1 General considerations		6
5.2.2 Specific considerations		7
6 Considerations on services related to use of home healthcare products for increasing accessibility and usability		10
6.1 General considerations		10
6.2 Specific considerations		11
7 Considerations on environments for use of home healthcare products for increasing accessibility and usability		12
7.1 General considerations		12
7.2 Specific considerations		12
7.2.1 Lighting environment		12
7.2.2 Sound environment		13
7.2.3 Thermal and air quality environment		13
7.2.4 Others		13
Annex A (informative) Major home healthcare products and users		15
Annex B (informative) Examples of home healthcare products		18
Bibliography		24
