3-D human body scan data - Methods for the processing of human body scan data

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
3.1	3-D anthropometry	1
3.2	3-D scan data	2
3.3	Processing of 3-D human scan data	4
4	Methods for point-cloud processing	4
4.1	General	4
4.2	Registration	5
4.3	Merging	6
4.4	Denosing (noise removal)	6
4.5	Adjustment of point-cloud resolution	7
4.6	Meshing	7
4.7	Texture mapping	8
4.8	Saving of mesh	8
5	Methods for mesh processing	8
5.1	General	8
5.2	Editing of mesh	10
5.2.1	Merging	10
5.2.2	Hole-filling	10
5.2.3	Smoothing	11
5.3	Adjustment of mesh resolution	12
5.3.1	Mesh subdivision	12
5.3.2	Decimation (mesh downsampling)	13
5.3.3	Remesh (mesh optimization)	13
5.4	Landmarking for mesh alignment	14
5.5	Alignment of mesh coordinates	14
5.6	Template matching (mesh parameterization)	15
