

DIN EN ISO 10075-2:2024-12 (E)

Ergonomic principles related to mental workload - Part 2: Design principles (ISO 10075-2:2024)

Contents	Page
European foreword.....	4
Foreword.....	5
Introduction.....	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	7
4 Design principles	8
4.1 General principles.....	8
4.2 Design principles in relation to work organisation.....	9
4.2.1 Perform system design reviews and include prospective risk assessment.....	9
4.2.2 Individuals' and team work-related objectives.....	9
4.2.3 Extended reachability.....	10
4.2.4 Flexibility in time allocation.....	10
4.2.5 Definition of work-related services.....	11
4.2.6 Duration of working hours.....	11
4.2.7 Time off between successive work days or shifts.....	11
4.2.8 Time of day.....	12
4.2.9 Shift work.....	13
4.2.10 Breaks and rest pauses.....	13
4.3 Design principles in relation to working tasks.....	13
4.3.1 Operating strategies.....	13
4.3.2 Continuous time constraints.....	14
4.3.3 Flexibility of decision-making.....	14
4.3.4 Ambiguity of task goals.....	15
4.3.5 Complexity of task requirements.....	15
4.3.6 Time sharing.....	16
4.3.7 Dimensionality of motor performance.....	16
4.3.8 Mental models.....	17
4.3.9 Parallel versus serial processing.....	17
4.3.10 Decision support.....	17
4.3.11 Sustained attention.....	18
4.4 Design principles in relation to job.....	18
4.4.1 Social interaction.....	18
4.4.2 Dependencies on others' task performance.....	19
4.4.3 Identical task requirements.....	19
4.4.4 Confidential communication.....	20
4.4.5 Changes in task-related activities with different demands or types of mental workload.....	20
4.5 Design principles in relation to work equipment and interfaces.....	20
4.5.1 Design the socio-technical system transparent for the user.....	20
4.5.2 Re-evaluate after adopting an assistance system to an existing system.....	21
4.5.3 Time lag.....	21
4.5.4 Adequacy of information.....	21
4.5.5 Ambiguity of information.....	22
4.5.6 Signal discriminability.....	22
4.5.7 Redundancy.....	22
4.5.8 Compatibility.....	23

4.5.9	Accuracy of information processing.....	24
4.5.10	Controllability.....	24
4.5.11	Control dynamics.....	24
4.5.12	Tracking requirements.....	25
4.5.13	Error tolerance.....	25
4.5.14	Adjust system design.....	25
4.5.15	Anticipate shifts in operating states and potential consequences.....	26
4.5.16	Coupling in human-machine arrangements.....	26
4.5.17	Adaptable and adaptive human-automation interaction.....	27
5	Information and training.....	27
Annex A (informative)	Design principles and their relation to the impairing consequences of mental strain.....	28
