ISO 9241-222:2026-06 (E)

Ergonomics of human-system interaction - Part 222: Self-assessment of human-centred design approach

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Human-centred design self-assessment **5**

5 How to use this document **5**

6 Human-centred design self-assessment survey **6**

6.1 General 6

6.1.1 Presentation 6

6.1.2 ORG versus PROJ questions 6

6.1.3 Scoring an assessment 7

6.2 Questions relating to human-centred design approach at an organization 7

6.2.1 Question: HCD in business strategy (ORG 1) 7

6.2.2 Question: HCD as normal practice (ORG 2) 8

6.2.3 Question: Integration with system development (ORG 3) 8

6.2.4 Question: Resources and infrastructure (ORG 4) 9

6.2.5 Question: Governance and performance (ORG 5) 10

6.2.6 Question: Introduction, operation, upgrade, and end of life of systems (ORG 6) 11

6.3 Questions relating to human-centred design approach for a project or projects 11

6.3.1 Question: Plan and manage HCD for projects (PROJ 1) 11

6.3.2 Question: Identify the context of use (PROJ 2) 12

6.3.3 Question: Establish user requirements (PROJ 3) 13

6.3.4 Question: Design solutions that meet user requirements (PROJ 4) 14

6.3.5 Question: User-centred evaluation (PROJ 5) 15

7 Relating the self-assessment to relevant standards and evaluator-led assessments **15**

8 Post-assessment approach **16**

8.1 General 16

8.2 More detailed assessment 16

8.3 Continuous improvement and re-assessment 17

8.4 Comparison 17

Annex A (informative) **Using the human-centred design self-assessment matrices** **18**

Annex B (Informative) **Human-centred design self-assessment matrix for evaluating organizations** **19**

Annex C (Informative) **Human-centred design self-assessment matrix for evaluating projects** **22**

Bibliography **24**
