DIN EN ISO 9920:2004-02 (E)

Ergonomics of the thermal environment - Estimation of the thermal insulation and evaporative resistance of a clothing ensemble (ISO 9920:1995)

Contents

Page

1 Scope 4

2 Principles and general definitions 4

3 Estimation of the thermal insulation of a clothing ensemble based on tables with values measured on standing thermal manikin 5

4 Estimation of the clothing area factor 6

5 Influence of body movements and wind on the thermal insulation of a clothing ensemble 7

6 Estimation of the evaporative resistance 7

Annexes

A Thermal insulation values for clothing ensembles 8

B Thermal insulation values for individual garments 23

C Measurement of the thermal insulation of clothin on a thermal manikin 50

D Measurement of the thermal insulation and evaporative resistance of a clothing ensemble on human subjets 51

E Different expressions for the thermal insulation of clothing . 52

F Evaporative resistance of a clothing ensemble 53
