DIN EN ISO 14505-2:2007-04 (E)

Ergonomics of the thermal environment - Evaluation of thermal environments in vehicles - Part 2: Determination of equivalent temperature (ISO 14505-2:2006)

Contents

Page

Foreword .....

Introduction .....

1 Scope .....

2 Normative references .....

3 Terms and definitions .....

4 Assessment principles .....
4.1 General description of equivalent temperature .....
4.2 General determination principle of equivalent temperature .....

5 Specific equivalent temperatures .....
5.1 General .....
5.2 Whole body equivalent temperature .....
5.3 Segmental equivalent temperature .....
5.4 Directional equivalent temperature .....
5.5 7.1 7.2 Annex B (informative) Characteristics and specifications of measuring instruments .....

Annex C (informative) Calibration and other determinations .....

Annex D (informative) Interpretation of equivalent temperature .....

Annex E (informative) Examples .....

Bibliography .....

. 3 10 11 11 13 16 22 24 27 29 Measuring instruments .....

Assessment .....

Omnidirectional equivalent temperature .....

Determination of whole body equivalent temperature .....

Determination of local equivalent temperature .....

Annex A (informative) Examples of measuring instruments .....
