## Web-service-based application programming inter face (WAPI) in financial services

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Design principles .....	3
4.1	General .....	3
4.2	Standards compatibility .....	3
4.3	Extensibility .....	3
4.4	Non-repudiation .....	3
4.5	Web resource unique identifiers (ID fields) .....	3
4.6	Idempotency .....	3
4.7	States .....	3
5	Related technology .....	3
5.1	General .....	3
5.2	Representational state transfer (REST) and simple object access protocol (SOAP) .....	3
5.2.1	General .....	3
5.2.2	REST .....	4
5.2.3	SOAP .....	4
5.3	WebSocket and Webhook .....	5
5.3.1	General .....	5
5.3.2	WebSocket .....	5
5.3.3	Webhook .....	5
5.4	HTTPS .....	6
5.5	JSON and XML .....	6
5.5.1	General .....	6
5.5.2	JSON .....	6
5.5.3	XML .....	6
5.6	Content negotiation .....	7
5.7	RESTful API description languages .....	7
6	Naming conventions .....	7
7	Resource path .....	8
7.1	General .....	8
7.2	Resource hops .....	8
7.3	Single resource versus collections of resources .....	9
8	WAPI styles .....	9
8.1	General .....	9
8.2	REST .....	10
8.2.1	General .....	10
8.2.2	Uniform interface .....	11
8.2.3	Apply the standard HTTP methods .....	12
8.2.4	Stateless sessions .....	13
8.2.5	Idempotency .....	13

8.2.6	Composition of the URI .....	14
8.2.7	Handling associations between resources .....	14
8.2.8	Request parameter usage .....	14
8.2.9	Post usage .....	17
8.2.10	The response .....	18
8.3	Asynchronous messaging and server push .....	21
8.3.1	Bidirectional communication model .....	22
8.3.2	Message subscription .....	23
8.3.3	Message publish .....	24
9	Data payload syntax .....	24
9.1	JSON .....	24
9.1.1	General .....	24
9.1.2	Syntax and structure .....	24
9.1.3	Data types .....	26
9.2	XML .....	26
9.2.1	General .....	26
9.2.2	Syntax and structure .....	26
9.2.3	Data types .....	28
10	Security and authentication .....	30
10.1	General .....	30
10.2	TLS .....	30
10.2.1	Certificate issuance and verification .....	31
10.3	Application and access layer security .....	32
10.3.1	Introduction .....	32
10.3.2	Overview of the OAuth 2.0 protocol .....	33
10.4	Read-only security profile .....	33
10.5	Read and write security profile .....	33
10.6	Message level integrity, source authentication and non-repudiation .....	34
10.6.1	General .....	34
10.6.2	Signing HTTP requests and responses .....	34
10.6.3	Signing JSON Payload .....	34
10.6.4	HTTP signature .....	35
10.7	Message level encryption .....	35
10.8	Version control .....	35
11	Use cases .....	36
11.1	ISO 20022 Web services .....	36
11.1.1	Introduction .....	36
11.1.2	Modelling guidelines .....	36
11.2	Mapping rules .....	39
11.2.1	RepositoryConcept .....	39
11.2.2	MessageDefinition .....	39
11.2.3	MessageBuildingBlock .....	40
11.2.4	MessageComponent .....	40
11.2.5	ChoiceComponent .....	41
11.2.6	MessageElement .....	42
11.2.7	ISO 20022 DataType transformation to JSON Schema .....	43
Annex A (informative)	Approach to FX trading .....	49
Bibliography	.....	52
