

DIN EN ISO 24157:2008-11 (E)

Ophthalmic optics and instruments - Reporting aberrations of the human eye (ISO 24157:2008)

Contents

Page

Foreword.....	3
1 Scope	4
2 Normative references	4
3 Terms and definitions.....	4
4 Coordinate system.....	8
5 Representation of wavefront data.....	9
5.1 Representation of wavefront data with the use of Zernike polynomial function coefficients	9
5.2 Representation of wavefront data in the form of wavefront gradient fields or wavefront error function values	12
5.3 Gradient fit error	13
6 Presentation of data representing the aberrations of the human eye	13
6.1 General.....	13
6.2 Aberration data presented in the form of normalized Zernike coefficients.....	14
6.3 Aberration data presented in the form of normalized Zernike coefficients given in magnitude/axis form.....	14
6.4 Aberration data presented in the form of topographical maps	15
6.5 Presentation of pooled aberration data.....	17
Annex A (informative) Methods of generating Zernike coefficients	18
Annex B (informative) Conversion of Zernike coefficients to account for differing aperture sizes, decentration and coordinate system rotation	20
Annex C (informative) Conversion between Zernike coefficients represented in different systems of notation	28
Annex D (informative) Computer algorithm to generate partial derivative weighting matrices for un-normalized Zernike polynomial functions	30
Annex E (informative) Table of normalized Zernike polynomial functions (to 6th radial order)	32
Bibliography	34
