DIN ISO 9039:2008-08 (E)

Optics and photonics - Quality evaluation of optical systems - Determination of distortion (ISO 9039:2008)

Contents

Page

National Annex NA (informative) Bibliography 3

Introduction 4

1 Scope 5

2 Terms and definitions 5

3 Classes of application 7
3.1 Infinite object distance, finite image distance 7
3.2 Infinite object distance, infinite image distance 7
3.3 Finite object distance, finite image distance 7
3.4 Finite object distance, infinite image distance 8

4 Test methods 8
4.1 General 8
4.2 Apparatus 9

5 Procedure 15
5.1 Reference angle of the optical system to be tested 15
5.2 Coordinate origin 15
5.3 Selection of image heights 15

6 Evaluation 16
6.1 Calculation of the reference quantities a, a, m or 16
6.2 Calculation of the distortion 16

7 Presentation of the results 16

8 Test report 17

Annex A (informative) Example for a method of shifting the zero point 18

Annex B (informative) Picture-height distortion value 21

Bibliography 23
