

DIN ISO 9039:2008-08 (E)

Optics and photonics - Quality evaluation of optical systems - Determination of distortion (ISO 9039:2008)

| Contents | | Page |
|---|--|-------------|
| National Annex NA (informative) Bibliography | | 3 |
| Introduction | | 4 |
| 1 | Scope | 5 |
| 2 | Terms and definitions | 5 |
| 3 | Classes of application | 7 |
| 3.1 | Infinite object distance, finite image distance | 7 |
| 3.2 | Infinite object distance, infinite image distance | 7 |
| 3.3 | Finite object distance, finite image distance | 7 |
| 3.4 | Finite object distance, infinite image distance | 8 |
| 4 | Test methods | 8 |
| 4.1 | General | 8 |
| 4.2 | Apparatus | 9 |
| 5 | Procedure | 15 |
| 5.1 | Reference angle of the optical system to be tested | 15 |
| 5.2 | Coordinate origin | 15 |
| 5.3 | Selection of image heights | 15 |
| 6 | Evaluation | 16 |
| 6.1 | Calculation of the reference quantities a , a , m or | 16 |
| 6.2 | Calculation of the distortion | 16 |
| 7 | Presentation of the results | 16 |
| 8 | Test report | 17 |
| Annex A (informative) Example for a method of shifting the zero point | | 18 |
| Annex B (informative) Picture-height distortion value | | 21 |
| Bibliography | | 23 |
| National foreword | | 3 |
