Implants for surgery - Retrieval and analysis of surgical implants - Part 1: Retrieval and handling

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Method	2
3.1	Obtaining the clinical history of the implant and patient	2
3.2	Pre-explantation checks and examinations	2
3.3	Collecting the surgical implant	2
3.4	Collecting the tissue and fluid samples	3
3.5	Photographic record of the explantation	3
3.6	Containing and labelling the retrieved surgical implant, tissues and fluids for future identification	4
3.7	Cleaning the retrieved surgical implant	4
3.8	Decontaminating the retrieved surgical implant	7
3.9	Packaging the retrieved surgical implant, tissues and fluids for shipment	7
3.10	Use of coolant materials	8
3.11	Labelling of the packing materials	8
3.12	Documentation to be supplied with retrieved surgical implants	8
3.13	Unpacking following shipment	9
3.14	Cleaning and decontamination following shipment	9
3.15	Documentation to be maintained during examination, analysis and storage	9
4	Analysis of retrieved surrounding tissues and fluids	10
5	Infection control	10
5.1	General	10
5.2	Work practices	10
5.3	Personal protective equipment	10
5.4	Maintenance of the worksite	11
5.5	Human waste disposal	13
5.6	Special practices	13
Annex A (informative)	Suggested minimum information to be obtained for retrieved surgical implants	14
Annex B (informative)	Generic procedures for the decontamination of surgical implants	16
Annex C (informative)	Analyses to be performed on retrieved tissue samples and fluids	22
