

DIN EN ISO 25539-3:2012-03 (E)

Cardiovascular implants - Endovascular devices - Part 3: Vena cava filters (ISO 25539-3:2011)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	General requirements	9
4.1	Classification	9
4.2	Size	9
5	Intended performance	9
6	Design attributes	9
6.1	General	9
6.2	Sheath/dilator kit for endovascular filter system	9
6.3	Filter system	9
6.4	Filter	9
6.5	Optional filter	10
6.6	Sheath/dilator kit for endovascular retrieval/conversion system	10
6.7	Retrieval/conversion system	10
6.8	Endovascular systems	10
7	Materials	11
8	Design evaluation	11
8.1	General	11
8.2	Sampling	11
8.3	Conditioning of test samples	12
8.4	Reporting	12
8.5	Bench and analytical tests	13
8.6	Preclinical in vivo evaluation	28
8.7	Clinical evaluation	32
9	Post-market surveillance	36
10	Manufacturing	36
11	Sterilization	36
11.1	Products supplied sterile	36
11.2	Products supplied non-sterile	37
11.3	Sterilization residuals	37
12	Packaging	37
12.1	Protection from damage in storage and transport	37
12.2	Marking	38
12.3	Information supplied by the manufacturer	39

Annex A (informative) Attributes of endovascular devices -- Vena cava filters -- Technical and clinical considerations	41
Annex B (informative) Descriptions of potential device effects of failure and failure modes and descriptions of detrimental clinical effects	55
Annex C (informative) Bench and analytical tests	59
Annex D (informative) Test methods	63
Annex E (informative) Examples of terms for clinical use of vena cava filters	90
Bibliography	92
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC	98
