

DIN EN ISO 10993-12:2012-10 (E)

Biological evaluation of medical devices - Part 12: Sample preparation and reference materials (ISO 10993-12:2012)

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 General requirements	7
5 Reference materials (RMs)	8
5.1 General	8
5.2 Certification of RMs for biological safety testing	8
6 Use of RMs as experimental controls	8
7 Test sample selection	9
8 Test sample and RM preparation	9
9 Selection of representative portions from a device	9
10 Preparation of extracts of samples	10
10.1 General	10
10.2 Containers for extraction	10
10.3 Extraction conditions and methods	10
10.4 Extraction conditions for hazard identification and risk estimation in the exaggerated-use condition (points to consider in relation to Annex D)	13
11 Records	13
Annex A (informative) Experimental controls	14
Annex B (informative) General principles on, and practices of, test sample preparation and sample selection	16
Annex C (informative) Principles of test sample extraction	18
Annex D (informative) Exhaustive extraction of polymeric materials for biological evaluation	21
Bibliography	23
Annex ZA	25
Annex ZB	26
