

ISO/TS 16976-4:2012-06 (E)

Respiratory protective devices - Human factors - Part 4: Work of breathing and breathing resistance: Physiologically based limits

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions, symbols and abbreviated terms	1
3.1	Terms and definitions	1
3.2	Symbols and abbreviated terms	2
4	Pressure and volume changes during breathing	2
4.1	Pressure and volume changes in the absence of an RPD	2
4.2	The effect of RPD flow resistance on pressure and volume changes while using an RPD	6
4.3	The effect of RPD with static pressure on pressure and volume changes while using an RPD	6
4.4	The effect of RPD flow resistance and static pressure on pressure and volume changes while using an RPD	7
4.5	Effects of high static pressure	8
5	Work of breathing (WOB)	8
5.1	Physiological work versus physical work	8
5.2	Calculations of inspiratory WOB	9
5.3	Calculations of expiratory WOB	10
5.4	Calculations of total WOB	10
5.5	Breathing resistance	12
5.6	Physiologically acceptable WOB	12
6	Other respiratory loads	13
6.1	Static load	13
6.2	Elastic loads	14
6.3	Other loads	14
6.4	How respiratory loads add up	14
7	Summary	14
