

DIN EN ISO 22665:2013-04 (E)

Ophthalmic optics and instruments - Instruments to measure axial distances in the eye (ISO 22665:2012)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Requirements	6
5	Test methods	6
5.1	General	6
5.2	True parameters of the test bodies	6
5.3	Measurements with ultrasound biometry instruments	7
5.4	Measurements with optical biometry instruments	7
6	Accompanying documents	7
7	Marking	7
Annex A (normative) Test bodies and evaluation of measurements		8
A.1	Test bodies	8
A.1.1	General	8
A.1.2	Material properties	8
A.1.3	Geometry of test cylinders	9
A.2	Evaluation of measurements	10
A.2.1	Measurements using ultrasound biometry instruments	10
A.2.2	Measurements using optical biometry instruments	10
Bibliography		11
