

ISO 12311:2013-08 (E)

Personal protective equipment - Test methods for sunglasses and related eyewear

Contents		Page
Foreword		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Prerequisites	1
5	General test requirements	2
6	Test methods for assessing the construction and materials	2
6.1	Prior assessment of construction, marking and information	2
6.2	Test method for assessment of filter material and surface quality	2
7	Test methods for measuring spectrophotometric properties	3
7.1	Measurement of spectral transmittance ()	3
7.2	Measurement of uniformity of luminous transmittance	5
7.3	Calculation of ultraviolet transmittance	7
7.4	Calculation of solar blue-light transmittance s_b	9
7.5	Calculation of solar IR transmittance S_{IR}	9
7.6	Measurement of absolute spectral reflectance ()	9
7.7	Absolute luminous reflectance V	10
7.8	Calculation of relative visual attenuation quotient for signal light detection Q_{signal}	11
7.9	Wide angle scatter	11
7.10	Polarizing filters	14
7.11	Photochromic filters	17
8	Test methods for measuring optical properties	19
8.1	Test method for spherical, astigmatic and prismatic refractive powers	19
8.2	Test method for the prism imbalance of complete sunglasses or filters covering both eyes	23
8.3	Test method for local variations in refractive power	25
9	Test methods for mechanical properties	30
9.1	Test method for minimum robustness of filters	30
9.2	Test method for impact resistance of filters, strength level 1	33
9.3	Test method for impact resistance of sunglasses, strength level 1	35
9.4	Test method for impact resistance of sunglasses, strength level 2	36
9.5	Test method for impact resistance of sunglasses, strength level 3	37
9.6	Test method for frame deformation and filter retention	39
9.7	Test method for increased endurance of sunglasses	42
9.8	Test method for resistance to solar radiation	46
9.9	Test method for resistance to ignition	48
9.10	Test for resistance to perspiration of the sunglass frame	48
Annex A (normative)	Application of uncertainty of measurement	52
Annex B (informative)	Sources of uncertainty in spectrophotometry and their estimation and control	54

Annex C (informative) Definitions in summations form	61
Annex D (normative) Product of the energy distribution of Standard Illuminant D65 as specified in ISO 11664-2 and the spectral visibility function of the average human eye for daylight vision as specified in ISO 11664-1	65
Annex E (normative) Spectral functions for the calculation of solar UV and solar blue light transmittance values	66
Annex F (normative) Spectral distribution of solar irradiance in the infrared spectrum for the calculation of the solar infrared transmittance [7]	68
Annex G (normative) Reference test headforms	70
Annex H (normative) Spectral distribution of radiation in incandescent signal lights weighted by the sensitivity of the human eye $V(\lambda)$	72
Annex I (informative) Spectral distribution of radiation in LED signal lights weighted by the sensitivity of the human eye $V(\lambda)$	75
Annex J (normative) Long wavelength pass filter	78
Annex K (informative) Method of variable distance for the calibration of the telescope	82
Annex L (normative) Method to correct transmittance for variations in thickness of the filter	84
Bibliography	85
