

ISO 8255-2:2013-09 (E)

Microscopes - Cover glasses - Part 2: Quality of materials, standards of finish and mode of packaging

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements	2
4.1 Transparency and colour	2
4.2 Non-flatness (waviness) and non-parallelism	2
4.3 Durability	3
4.4 Surface quality and inclusions	3
4.5 Edge finish	3
4.6 Cleanliness and cloudiness	3
4.7 Adhesion	3
4.8 Residual stress/birefringence	3
5 Sampling	3
5.1 General	3
5.3 Drawing of samples and units inspection	4
6 Test methods	4
6.1 General	4
6.2 Package suitability	4
6.3 Adhesion	5
6.4 Cleanliness and cloudiness	5
6.5 Surface quality and inclusions	5
6.6 Transparency and colour	6
6.7 Edge finish	6
6.8 Non-flatness (waviness) and non-parallelism	6
6.9 Durability -- Chemical durability of surface and resistance to atmospheric attack (Solubility)	6
6.10 Residual stress/birefringence	7
7 Marking/labelling	7
8 Packaging	7
Annex A (normative) Sample size code letters and single sampling plans for normal inspection	8
Bibliography	10
