DIN EN 14594:2018-07 (E)

Respiratory protective devices - Continuous flow compressed air line breathing devices - Requirements, testing and marking

Contents

Page

European foreword 5

1 Scope 6

2 Normative references 6

3 Terms, description and symbols 7
3.1 Terms 7
3.2 Description 8
3.3 Symbols 8

4 Classification 9

5 Requirements 9
5.1 General 9
5.2 Nominal values and tolerances 9
5.3 Ergonomics 9
5.4 Design 10
5.5 Materials 10
5.6 Practical performance 10
5.7 Connections 10
5.7.1 General 10
5.7.2 Couplings 11
5.7.3 Strength of breathing hose connections 11
5.7.4 Connection between RPD and mask 11
5.7.5 Connection between RPD and hood, helmet or suit 11
5.7.6 Unacceptable connections 11
5.8 Body harness or belt 11
5.9 Pre-conditioning 11
5.10 Flammability 12
5.11 Mobile compressed air supply systems, if applicable 12
5.11.1 General 12
5.11.2 Pressure reducer 12
5.11.3 Pressure reducer relief valve 12
5.12 Warning devices for compressed air supply systems 13
5.12.1 General 13
5.12.2 Audible warning device 13
5.13 Compressed air supply tube 13
5.13.1 Resistance to kinking 13
5.13.2 Resistance to collapse 14
5.13.3 Strength 14
5.13.4 Flexibility 14
5.13.5 Heat resistance 14
5.13.6 Electrostatic properties 14
5.13.7 Couplings 14
5.13.8 Resistance to pressure 14
5.13.9 Flammability 14
5.13.10 Working length 15
5.14 Breathing hose 15
5.14.1 Resistance to kinking 15

5.14.2 Resistance to collapse 15
5.15 Air flow rates 15
5.16 Adjustable parts 15
5.17 Facepieces 15
5.17.1 Full face mask or half masks 15
5.17.2 Hood, helmet or suit 16
5.18 Inward leakage 17
5.19 Breathing resistance 18
5.19.1 RPD with full face mask/half mask 18
5.19.2 RPD incorporating a hood/helmet/suit 18
5.20 Carbon dioxide content of inhalation air 18
5.20.1 Air supply on 18
5.20.2 Air supply off 18
5.21 Leaktightness 18
5.22 Checking and warning facilities 19
5.23 Resistance to abrasion 19

6 Testing 19
6.1 General 19
6.2 Inspection 20
6.3 Practical performance test 21
6.3.1 General 21
6.3.2 Preparation of RPD to be tested 21
6.3.3 Test conditions 21
6.3.4 Work simulation test 21
6.3.5 Information to be recorded 22
6.3.6 Practical performance tests at low temperature 22
6.4 Strength of breathing hose connections 23
6.5 Resistance to collapse of breathing hose 23
6.5.1 Principle 23
6.5.2 Apparatus 23
6.5.3 Procedure 24
6.6 Strength of compressed air supply tube, body harness and couplings 24
6.7 Pre-conditioning 25
6.7.1 Procedure 25
6.7.2 Laboratory test at - 15 °C 25
6.8 Flammability 25
6.9 Pressure reducer relief valve 26
6.10 Resistance to kinking of compressed air supply tube 26
6.10.1 Corner kinking for Class A RPD 26
6.10.2 Coil kinking for Class B RPD 27
6.11 Resistance to collapse of compressed air supply tube (Class A and Class B) 30
6.11.1 Principle 30
6.11.2 Apparatus 30
6.11.3 Procedure 30
6.12 Heat resistance of compressed air supply tube 30
6.13 Carbon dioxide content of the inhalation air 31
6.14 Inward leakage 31
6.14.1 Inward leakage test method 31
6.14.2 Prerequisites for inward leakage determination 31
6.15 Warning device 33
6.15.1 Apparatus 33
6.15.2 Procedure 33
6.15.3 Report 33
6.16 Mechanical resistance of lens(es) or visor(s) (hood/helmet/suit) 36
6.17 Breathing resistance 36
6.17.1 General 36
6.17.2 Inhalation resistance 36
6.17.3 Exhalation resistance 36
6.18 Sound level measurement inside the hood/helmet/suit 37
6.19 Strength of attachment of exhalation valve (hood/helmet/suit) 37

6.20 Air supply flow rate 38
6.20.1 Principle 38
6.20.2 Apparatus 38
6.20.3 Procedure 38
6.21 Resistance to abrasion of protective clothing 39
6.22 Effective mass supported by the facepiece 39
6.23 Leaktightness 40

7 Marking 40

8 Information supplied by the manufacturer 41

Annex ZA (informative) Relationship between this European Standard and the essential health and safety requirements of Regulation 2016/425/EU [2016 OJ L81] aimed to be covered 43
