

ISO 6425:2018 (E)

Horology — Divers' watches

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Test methods and requirements
4.1	General
4.1.1	Temperature
4.1.2	Visual checking
4.1.3	Tested product configuration
4.1.4	Practical meaning
4.1.5	Diving time indicator
4.1.6	Type testing and 100 % single watch testing
4.1.6.1	Type testing
4.1.6.2	100 % single watch testing
4.2	Visibility
4.2.1	In the light
4.2.2	In the dark
4.3	Magnetic resistance properties
4.4	Temperature cycling
4.5	Salt spray test (with bracelet)
4.6	Shock-resistance properties (on watch head)
4.7	Water-resistance
4.7.1	Functional devices in shallow water
4.7.2	Resistance when strain is applied to crown and other setting devices
4.7.3	Functional devices at a water overpressure
4.7.4	Resistance at a water overpressure
4.8	Shock-resistance properties (free-fall)
4.9	Resistance of attachments
4.10	Condensation test
5	Marking
6	Usage and maintenance recommendations
Annex A	(normative) Divers' watches for saturation diving
A.1	General
A.2	Requirements and test of operation at a helium gas overpressure (type testing)
A.3	Marking
Annex B	(informative) Air-resistance at an air overpressure
B.1	Requirements and test
B.1.1	Test example
Annex C	(informative) Diving chart
Annex D	(informative) Usage and maintenance recommendations
