ISO 5834-4:2019 (E)

Implants for surgery — Ultra-high-molecular-weight polyethylene — Part 4: Oxidation index measurement method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Test articles

5 Materials and apparatus

5.1 Materials
5.2 Apparatus

6 Significance and use

7 Procedure

7.1 Preparation of test specimens
7.2 Configuration of test specimen in the spectrometer
7.3 Preparation of the infrared spectrometer

8 Calculations

8.1 General
8.2 Oxidation peak area
8.3 Normalization peak area
8.4 Oxidation index
8.5 Depth locator
8.6 Sample's surface oxidation index
8.7 Sample's bulk oxidation index
8.8 Sample's oxidation index profile

9 Reports

9.1 General
9.2 Information concerning the material
9.3 Sample information
9.4 IR spectrometer parameters
9.5 Calculation methods
9.6 Sample's calculated surface oxidation index
9.7 Sample's calculated bulk oxidation index
9.8 Sample's calculated oxidation index profile
