

DIN EN ISO 5840-1:2021-05 (E)

Cardiovascular implants - Cardiac valve prostheses - Part 1: General requirements (ISO 5840-1:2021)

Contents		Page
European foreword		4
Foreword		5
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	8
4	Abbreviations	21
5	Fundamental requirements	21
6	Device description	22
6.1	General	22
6.2	Intended use	22
6.3	Design inputs	22
6.3.1	Operational specifications	22
6.3.2	Performance specifications	23
6.3.3	Implant procedure	23
6.3.4	Packaging, labelling, and sterilization	23
6.4	Design outputs	24
6.5	Design transfer (manufacturing verification/validation)	24
6.6	Risk management	24
7	Design verification and validation	24
7.1	General requirements	24
7.2	In vitro assessment	24
7.2.1	General	24
7.2.2	Test conditions, sample selection and reporting requirements	25
7.2.3	Material property assessment	26
7.2.4	Hydrodynamic performance assessment	27
7.2.5	Structural performance assessment	27
7.2.6	Design- or procedure-specific testing	29
7.2.7	Device MRI compatibility	29
7.2.8	Simulated use	29
7.2.9	Human factors/usability assessment	29
7.2.10	Implant thrombogenic and haemolytic potential assessment	29
7.3	Preclinical in vivo evaluation	30
7.4	Clinical investigations	30
Annex A (informative)	Rationale for the provisions of ISO 5840-1	31
Annex B (normative)	Packaging	34
Annex C (normative)	Product labels, instructions for use, and training	35
Annex D (normative)	Sterilization	38

Annex E (normative) In vitro test guidelines for paediatric devices	39
Annex F (informative) Corrosion assessment	43
Annex G (informative) Echocardiographic protocol	46
Annex H (informative) Assessment of implant thrombogenic and haemolytic potential	48
Annex I (informative) Guidelines for hydrodynamic performance characterization by steadyflowtesting	59
Annex J (normative) Durability testing	66
Annex K (informative) Fatigue assessment	74
Annex L (normative) Clinical investigation endpoints for heart valve replacement devices	79
Bibliography	82
