

ISO 15227:2000-04 (E)

Optics and optical instruments - Microscopes - Testing of stereomicroscopes

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Accuracy of testing	1
5	Test conditions	1
5.1	Total visual magnification (MTOT VIS)	1
5.2	Difference in total visual magnification between left and right optical systems	2
5.3	Difference in axes between left and right optical systems	2
5.4	Difference in the centres of the image fields between left and right optical systems	2
5.5	Difference in imaging rotations between right and left images	2
5.6	Axial shift of object plane by magnification change	2
5.7	Lateral shift of image plane by magnification change	2
5.8	Focus difference between left and right optical systems	2
5.9	Resolution for the highest magnification at the centre of the field	2
5.10	Difference in exit pupil heights between left and right optical systems	2
5.11	Minimum range for interpupillary distance	2
5.12	Calibration error if a dioptr scale is used	2
5.13	Minimum eyepiece dioptr adjustment range	2
6	Test methods	3
6.1	Apparatus	3
6.2	Apparatus configuration	4
6.3	Test procedures	4
