ISO 10993-12:2021 (E)

Biological evaluation of medical devices — Part 12: Sample preparation and reference materials

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General requirements

5 Reference materials (RMs)

- 5.1 General
- 5.2 Certification of RMs for biological safety testing

6 Use of RMs as experimental controls

7 Test sample selection

8 Test sample and RM preparation

9 Selection of representative portions from a medical device

10 Preparation of extracts of samples

- 10.1 General
- 10.2 Containers for extraction
- 10.3 Extraction conditions and methods
- 10.4 Extraction conditions for materials that polymerize in situ

11 Records

Annex A (informative) Experimental controls

Annex B (informative) General principles on, and practices of, test sample preparation and sample selection

Annex C (informative) Principles of test sample extraction

Annex D (informative) Exhaustive extraction of polymeric materials for biological evaluation

- D.1 General
- D.2 Points to be considered for exhaustive extraction of polymeric medical devices for biological testing
