

ISO 5910:2024-07 (E)

Cardiovascular implants and extracorporeal systems - Cardiac valve repair devices

Contents

Page

Foreword..... v

1 Scope..... 1

2 Normative references..... 1

3 Terms and definitions..... 2

4 Abbreviated terms..... 9

5 Fundamental requirements..... 10

5.1 General..... 10

5.2 Risk management..... 10

6 Device design..... 10

6.1 Intended use and indication for use..... 10

6.2 Design inputs..... 10

6.2.1 General..... 10

6.2.2 Operational specifications..... 10

6.2.3 Functional, performance and safety requirements..... 12

6.2.4 Usability..... 13

6.2.5 Packaging, labelling and sterilization..... 13

6.3 Design outputs..... 13

6.4 Design transfer (manufacturing verification and validation)..... 13

7 Design verification testing and analysis, and design validation..... 14

7.1 General requirements..... 14

7.2 In vitro assessment..... 14

7.2.1 General..... 14

7.2.2 Test articles, sample selection, test conditions and reporting requirements..... 14

7.2.3 Device material property assessment..... 16

7.2.4 Device durability assessment..... 17

7.2.5 Device corrosion assessment..... 17

7.2.6 Design specific testing..... 17

7.2.7 Visibility..... 17

7.2.8 Simulated use assessment..... 18

7.2.9 Human factors and usability assessment..... 18

7.2.10 Device MRI safety..... 18

7.3 Preclinical in vivo evaluation..... 18

7.3.1 General..... 18

7.3.2 Overall requirements..... 18

7.3.3 Methods..... 20

7.3.4 Test report..... 21

7.4 Clinical investigations..... 22

7.4.1 General..... 22

7.4.2 Study considerations..... 22

7.4.3 Study end points..... 24

7.4.4 Ethical considerations..... 25

7.4.5 Distribution of subjects and investigators..... 25

7.4.6 Statistical considerations including sample size and duration..... 26

7.4.7 Patient selection criteria..... 27

7.4.8 Clinical data requirements..... 28

7.4.9 Clinical investigation analysis and reporting..... 31

7.4.10 Post-market clinical follow-up..... 31

8	Manufacturing verification and validation	32
Annex A (informative)	Rationale for the provisions of this document	33
Annex B (informative)	Types and examples of heart valve repair devices and delivery systems	36
Annex C (normative)	Packaging	43
Annex D (normative)	Product labels, instructions for use and training	44
Annex E (normative)	Sterilization	47
Annex F (informative)	Heart valve repair system characteristics	48
Annex G (informative)	Example of a transcatheter heart valve repair system hazard analysis	50
Annex H (informative)	In vitro test guidelines for paediatric devices	51
Annex I (informative)	Identification of boundary conditions	54
Annex J (informative)	Test platforms for in vitro testing	58
Annex K (informative)	Considerations for device material properties undergoing alterations post implantation	60
Annex L (informative)	Corrosion assessment	61
Annex M (informative)	Durability assessment	64
Annex N (informative)	Additional device design evaluation considerations	71
Annex O (normative)	Delivery system design evaluation	74
Annex P (informative)	Preclinical ex vivo and in vivo evaluations	76
Annex Q (normative)	Adverse event classification during clinical investigation	80
Annex R (informative)	Multimodality imaging of TAVr, TMVr and TTVr (pre-, peri- and post-implantation)	86
Annex S (informative)	Clinical investigation end points for valve repair devices: Suggestions for end points and their timing	91
	Bibliography	95
