DIN EN ISO 7197:2025-02 (E)

Neurosurgical implants - Sterile, single-use hydrocephalus shunts (ISO 7197:2024)

Contents

Page

European foreword ... **3**

Annex ZA (informative) **Relationship between this European Standard the General Safety and Performance Requirements of Regulation (EU) 2017/745 aimed to be covered** ... **4**

Foreword ... **7**

Introduction ... **8**

1 Scope ... **9**

2 Normative references ... **9**

3 Terms and definitions ... **9**

4 General requirements for shunts ... **10**
4.1 General ... 10
4.2 Radiopacity ... 10
4.3 Biocompatibility ... 10
4.4 Resistance to leakage ... 10
4.5 Control of the implanted shunt ... 11
4.6 Pressure-flow characteristics of the valve, the components and the pre-assembled shunt ... 11
4.7 Identification of shunts in vivo ... 11
4.8 Ability to withstand overpressure ... 11
4.9 Dynamic breaking strength ... 11
4.10 Behaviour under magnetic resonance imaging conditions ... 11
4.11 Bursting pressure ... 12

5 Specific requirements for components ... **12**
5.1 Valves ... 12
5.1.1 Reflux performance of shunts connecting the ventricle to the blood system ... 12
5.1.2 Long-term stability ... 12
5.1.3 Influence of the changed posture of the patient on the valve performance ... 12
5.2 Resistance of tubing and components ... 13

6 Marking and labelling of shunts ... **13**

7 Packaging ... **13**

8 Information supplied by the manufacturer ... 13
8.1 General ... 13
8.2 Instructions for use ... 13
8.3 Implant card ... 14

Bibliography ... **15**
