

ISO 12487:2026-05 (E)

Medical electrical equipment - Clinical performance evaluation of clinical thermometers

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General requirements	7
4.1	<i>Clinical investigation</i> methods	7
4.2	Good clinical practice	8
4.3	Status of previous <i>clinical investigations</i>	8
4.4	Disclosure of summary of <i>clinical investigation</i>	8
5	<i>Clinical investigation</i>	8
5.1	Subject requirements	8
5.1.1	Number	8
5.1.2	Age distribution	8
5.1.3	Body temperature distribution	9
5.1.4	Body site for <i>clinical investigation</i>	9
5.1.5	Exception criteria	10
5.2	<i>Clinical investigation</i> method with a <i>reference thermometer</i>	10
5.2.1	Environmental condition of <i>clinical investigation</i>	10
5.2.2	Subject preparation for body temperature stabilization	10
5.2.3	<i>Reference thermometer</i> measurement	11
5.2.4	<i>Clinical thermometer-under-test</i>	11
5.3	<i>Procedure</i>	11
5.3.1	<i>Clinical thermometers</i> with <i>time prediction</i>	12
5.3.2	<i>Clinical thermometers</i> with <i>site conversion</i>	12
6	Data analysis	13
6.1	Correction of the readings of the <i>reference thermometer</i>	13
6.2	<i>Clinical bias</i> calculation	13
6.3	Standard deviation of the <i>clinical bias</i> calculation	14
6.4	<i>Clinical repeatability</i> calculation	14
7	Acceptance criteria	14
7.1	Clinical bias	14
7.2	Standard deviation of the <i>clinical bias</i>	15
7.3	<i>Clinical repeatability</i>	15
Annex A (informative)	Particular guidance and rationale	16
Annex B (informative)	Guide to disclosure requirements	22
Annex C (informative)	Terminology — alphabetized index of defined terms	23
Bibliography		25
