ISO 8980-4:2026-06 (E)

Ophthalmic optics - Uncut finished spectacle lenses - Part 4: Specifications and test methods for the properties of anti-reflective coatings and hydrophobic coatings

Contents

Page

Foreword ... **iv**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Requirements ... **2**
4.1 General requirements ... 2
4.2 Usable diameter of coated area ... 3
4.3 Luminous and mean reflectances ... 3
4.4 Water repellency ... 3
4.5 Durability ... 3

5 Testing ... **3**
5.1 General ... 3
5.2 Anti-reflective coating ... 3
5.2.1 Method of determination of spectral reflectance ... 3
5.2.2 Determination of spectral reflectance values ... 4
5.2.3 Determination of luminous reflectance ... 4
5.2.4 Determination of mean reflectance ... 4
5.2.5 Information to be made available on request ... 4
5.3 Hydrophobic coating ... 5
5.3.1 Contact angle measurement apparatus ... 5
5.3.2 Water for testing ... 5
5.3.3 Sample ... 5
5.3.4 Procedure ... 5
5.4 Determination of durability ... 6
5.4.1 Equipment and consumables. ... 6
5.4.2 Test specimens ... 6
5.4.3 Test method: environmental cycling combined with rubbing sequences ... 6
5.4.4 Evaluation ... 7

6 Reference to this document ... **7**

Annex A (informative) **Significance of ρ_v and ρ_M in the description of anti-reflective coated lenses** ... **8**

Annex B (normative) **Environmental sequence** ... **9**

Annex C (normative) **Rubbing sequence procedure** ... **11**

Annex D (normative) **Evaluation of surface quality** ... **13**

Annex E (informative) **Examples of lenses passing and failing the visual evaluation** ... **15**

Annex F (informative) **Examples of environmental sequence** ... **16**

Annex G (informative) **Examples of a rubbing tool and components** ... **18**

Annex H (informative) **Example of a contact angle test apparatus** ... **20**

Bibliography ... **22**
