

DIN EN ISO 14880-3:2006-08 (E)

Optics and photonics - Microlens arrays - Part 3: Test methods for optical properties other than wavefront aberrations (ISO 14880-3:2006)

Contents	Page
Foreword	2
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Substrate test	5
5 Microscope test method	5
5.1 Principle	5
5.2 Measurement arrangement and test equipment	6
5.3 Preparation	8
6 Procedure	8
6.1 General	8
6.2 Measurement of effective back or front focal length	8
6.3 Measurement of chromatic aberration	8
6.4 Measurement of the uniformity of the focal spot positions	9
7 Results and uncertainties	9
8 Coupling efficiency, imaging quality	10
9 Test report	10
Annex A (informative) Measurements with wavefront measuring systems	12
Annex B (normative) Confocal measurement of effective back or front focal length of lens array	14
Annex C (informative) Coupling efficiency, imaging quality	16
Annex D (normative) Measurement of the uniformity of the focal spot positions of a microlens array	17
Bibliography	18
