Foreword to EN 10993-10:2002 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 General principles -- Step-wise approach 8

5 Pretest considerations 9
5.1 General 9
5.2 Types of material 9
5.3 Information on chemical composition 9
5.4 Material characterization 10

6 Irritation tests 10
6.1 In vitro irritation tests 10
6.2 Factors to be considered in design and selection of in vivo tests 10
6.3 Animal skin irritation test 11
6.4 Human skin irritation test 15

7 Delayed hypersensitivity tests 19
7.1 Choice of test 19
7.2 Choice of test sample concentrations 19
7.3 Other important factors affecting the outcome of the test 19
7.4 Maximization test for delayed hypersensitivity 20
7.5 Closed-patch test for delayed hypersensitivity 23

8 Key factors in interpretation of test results 25

Annex A (normative) Preparation of materials for irritation/sensitization testing 26

Annex B (normative) Special irritation tests 28

Annex C (informative) Background information 46

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directives 93/42/EEC and 90/385/EEC 50

Annex ZB (normative) Normative references to international publications with their relevant European publications 51

Bibliography 52
