

DIN EN ISO 10993-11:2006-11 (E)

Biological evaluation of medical devices - Part 11: Tests for systemic toxicity (ISO 10993-11:2006)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	General considerations	6
4.1	General	6
4.2	Selection of animal species	7
4.3	Animal status	7
4.4	Animal care and husbandry	7
4.5	Size and number of groups	7
4.6	Route of exposure	8
4.7	Sample preparation	8
4.8	Dosing	9
4.9	Body weight and food/water consumption	10
4.10	Clinical observations	10
4.11	Clinical pathology	10
4.12	Anatomic pathology	11
4.13	Study designs	11
4.14	Quality of investigation	11
5	Acute systemic toxicity	11
5.1	General	11
5.2	Study design	12
5.3	Evaluation criteria	13
5.4	Final report	14
6	Repeated exposure systemic toxicity (subacute, subchronic and chronic systemic toxicity)	15
6.1	General	15
6.2	Study design	16
6.3	Evaluation criteria	18
6.4	Final report	19
Annex A (informative) Routes of administration		20
Annex B (informative) Dosage volumes		22
Annex C (informative) Common clinical signs and observations		23
Annex D (informative) Suggested haematology, clinical chemistry and urinalysis measurements		24
Annex E (informative) Suggested organ list for histopathological evaluation		26
Annex F (informative) Information on material-mediated pyrogens		28

Bibliography	30
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directives 90/385/EEC and 93/42/EEC	31
