

DIN EN ISO 14607:2007-05 (E)

Non-active surgical implants - Mammary implants - Particular requirements (ISO 14607:2007)

Contents		Page
Foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Intended performance		6
5 Design attributes		6
6 Materials		7
7 Design evaluation		7
7.1 General		7
7.2 Pre-clinical evaluation		7
7.3 Clinical evaluation		10
7.4 Post-market surveillance		11
8 Manufacturing		11
9 Sterilization		11
10 Packaging		11
11 Information supplied by the manufacturer		11
11.1 General		11
11.2 Resterilization		12
11.3 Base dimensions		12
11.4 Effects on diagnostic techniques		12
11.5 Filling materials		12
11.6 Information on expected lifetime		12
11.7 Information for the patient		12
11.8 Labels		13
11.9 Information for the user		13
11.10 Marking on implants		13
11.11 Manufacturer's device card		13
Annex A (normative) Test for surface characteristics		14
Annex B (normative) Tests for shell integrity		15
Annex C (normative) Test method for valve competence and injection site competence		17
Annex D (normative) Test for silicone gel cohesion (silicone filling materials only)		19
Annex E (normative) Mechanical tests on a mammary implant in its implantable state		21

Annex F (normative) Information for the patient	26
Annex G (normative) Information for the user	28
Annex H (informative) Silicone release assessment from mammary implants by an in vitro method	29
Bibliography	32
Annex ZA (informative) Relationship between this International Standard and the Essential Requirements of EU Directive 93/42/EEC Medical Devices	33
