Foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms, definitions and abbreviated terms 7
3.1 Terms and definitions 7
3.2 Abbreviated terms 9

4 Description and hazards of LNG 9

5 Potential hazardous situations associated with LNG transfer 10

6 Possible factors affecting ship/shore interface and port operations 10

7 Jetty 11
7.1 Siting of jetty 11
7.2 Multi-product berths 12
7.3 Vapour return system 12

8 Marine operations 12
8.1 General 12
8.2 Port transit 12
8.3 Port services 13
8.4 Marine interface 14

9 Hazardous areas and electrical safety 17
9.1 Jetty's electrical safety 17
9.2 Insulating flanges 17

10 Security 17

11 Hazard management 18
11.1 Protection from leakage and spillage of LNG 18
11.2 Fire hazard management 18

12 Access and egress 19
12.1 General 19
12.2 Normal access and egress 19
12.3 Emergency access and egress 19

13 Onshore power supply 20

14 Ship/shore communications 20
14.1 General 20
14.2 Voice communications 20
14.3 Data communications 20
14.4 Emergency shut-down signal 20

15 Cargo transfer 21
15.1 Pre-cargo-transfer meeting 21
15.2 Marine transfer arms 22
15.3 Emergency shut-down and emergency release systems 23
15.4 Safety and maintenance of ESD, ERS and QC/DC systems 24

16 Custody transfer 25

17 Provision and training of staff 2
17.1 Staff for the terminal 25
17.2 Coordination 25

Annex A (informative) Ship's equipment 26

Annex B (informative) Typical cargo operation flow chart 27

Annex C (informative) General safety philosophy for stopping LNG transfer 28

Annex D (informative) Recommended pin configurations for fibre-optic and electric ship/shore links (SSLs) 29
